

February, 2020

BLAIR, MARGARET MENDENHALL
Vanderbilt University Law School
131 21st Ave. South
Nashville, TN 37203

Telephone: Office 615-322-6087

Current Position: Professor of Law and Milton R. Underwood Chair in Free Enterprise, 2010 – present. FedEx Research Professor, 2019 – 2020. Teach Corporations, Corporate Finance, and Seminars on theories of the firm, and role of corporations.

Previous Positions: Professor of Law, Vanderbilt University Law School, 2005 – 2010.
Visiting Professor of Law, Vanderbilt University Law School, 2004 – 2005.

Sloan Visiting Professor, Georgetown University Law Center, and Research Director, Georgetown-Sloan Project on Business Institutions; January, 2000 - June, 2004. (Worked with Prof. Lynn Stout in 1998-99 to secure original grant; arranged for visitors, organized workshops and conferences, planned and carried out research activities and wrote articles, prepared publicity and outreach materials, met with journalists, met and worked with scholars from other universities and institutions, and other countries. Also taught Corporate Finance, Corporations).

Non-resident Senior Fellow, Economic Studies Program, The Brookings Institution, January, 2000 – June 2004. (Directed and completed the Brookings Project on Understanding Intangible Sources of Value.)

Senior Fellow, Economic Studies Program, The Brookings Institution, January, 1995 - December, 2000. (Organized and raised funding for individual and collaborative research projects. Wrote reports, articles, and books. Organized conferences. Engaged with the media, Congressional staffers, other think tanks and academic institutions to collaborate on research, build bridges to other disciplines, educate other thought leaders and generate publicity for scholarship.)

Research Associate, Economic Studies Program, September, 1988 - December, 1994. (Researched and wrote books and articles, secured funding for and directed research projects involving multiple scholars, commissioned and edited articles and books, and organized conferences on corporate governance, corporations

and human capital, intangibles, mergers and acquisitions, and financial institutions.)

Visiting Associate Professor, Georgetown University Law Center, September, 1996 - December, 1999. (Teaching field: Corporate Finance.)

Adjunct Faculty, University of Maryland College of Business and Management; January, 1993 - June, 1994. (Teaching field: Business and Society.)

Research Fellow, The Brookings Institution; September, 1987 - August 1988.

Lecturer, Yale University; December, 1986 - June, 1987.

Economist, Federal Reserve Bank of New York; June 1985 - August 1985.

Bureau Manager, *Business Week* Magazine; September, 1979 - September 1982.

Correspondent, Houston office, *Business Week* Magazine; February, 1977 - August, 1979.

Bureau Manager, Houston office, Fairchild Publications; November, 1975 - February, 1977.

Reporter, *Houston Chronicle*, November, 1973 - November, 1975.

Education:

Ph.D., M. Phil., M.A., Economics, Yale University, 1989.
Honors and Fellowships: Leo Model Research Fellowship in Economics, Brookings Institution, 1987-1988; University Fellowship, Yale University, 1983-1987.

Special Student, Economics Department, Harvard University, 1982-1983.

B.A., Journalism, University of Oklahoma, 1973.
Honors and Fellowships: Phi Beta Kappa; Women in Communications Award for Highest G.P.A., School of Communications, 1973.

Doctoral Dissertation:

“Theory and Evidence on the Causes of Merger Waves”
Advisers: Sidney Winter (Chairman), Robert Shiller and Richard Levin. Accepted, Yale University, Spring, 1989.

Current Research Projects: ***A Team Production Framework for Understanding the Role of Corporate Boards of Directors.*** The “Team Production” theory of corporation law argues that boards of directors are an institutional mechanism for balancing competing interests at stake in a

corporate enterprise, and resolving disputes among these interests without resort to a court of law. This theory is consistent with the fact that corporate law assigns the responsibility for deciding a number of questions that are likely to be inherently contentious to the board of directors, and it is consistent with much of observed practice, such as the way that boards of directors are typically structured in venture capital firms. In this project, I am exploring these issues, and examining and reinterpreting a large body of empirical research on boards of directors which has largely failed

to

find consistent relationships between corporate performance (measured various ways) and the details of board composition, structure, and practice.

Corporate Personhood and the Supreme Court's Corporate Rights Jurisprudence. This project explores the idea of corporate "personhood", and the Supreme Court's approach to granting Constitutional Rights to corporations. It asserts that this concept was developed as a short-hand way for legal scholars, judges, and practitioners to refer to a bundle of functions that incorporation facilitated, including continuity over time in property ownership and in contractual relationships, creation of an identifiable persona to which intangible assets such as reputation, goodwill, and brand could attach, asset partitioning, and provision for internal governance by a board of directors. This framework can then be used in analyzing policy questions about whether a corporation should have other rights and duties normally afforded to "persons". The first article from this project was published as *The Four Functions of Corporate Personhood* in 2013. A second article, *Corporate Personhood and the Corporate Persona*, was published in 2013. A third article with Elizabeth Pollman, *The Derivative Nature of Corporate Constitutional Rights*, was published in 2015, and a fourth article, also with Elizabeth Pollman, *The Supreme Court's View of Corporate Rights: Two Centuries of Evolution and Controversy*, will be published in 2016.

The Macroeconomic Effects of Excessive Leverage. This work will examine the role played by financial innovation in dramatically increasing leverage ratios in the U.S. economy (and internationally as well) in the years leading up to the financial crisis of 2008-2009. The paper will argue that increased leverage in the economy acted like a rapidly expanding supply of "money" and near money instruments, inflating prices of certain classes of assets, and leading inexorably to the crash. The work suggests that the policy tools needed to prevent similar bubbles in the future are regulations to control the effective leverage of financial institutions, taking into account the impact that financial derivatives have.
